1. Missing memory management. i.e. *CollectionViewController* - <https://www.raywenderlich.com/966538-arc-and-memory-management-in-swift>
2. Missing access control (private) for @IBOutlet properties
3. Missing final class i.e. *DetailsViewController* - <https://medium.com/@MarcioK/swift-final-functions-under-the-hood-2deccd0b9437>
4. Avoid force unwrap. i.e. *APICaller*
5. Avoid unused code i.e. Extensions+UILabel and deprecated extension of APICaller
6. Prefer Decodable when an object is not going to be Encodable
